Thailand Field Site
BANGKOK, THAILAND

LEARN MORE AT IE.UNC.EDU/THAILAND
About the Thailand Field Site

Participants take classes consistent with their UNC degree program and perform a research capstone project that emphasizes multidisciplinary teamwork. Students live in Thai dorms, become involved in Thai culture, and have the opportunity to travel and go on field trips. They begin their experience at UNC with an introduction to Thai language and culture.

The Institute for the Environment’s field site program is coordinated through the Study Abroad Office of the College of Arts and Sciences in partnership with the Curriculum for the Environment and Ecology.

Location
King Mongkut’s University of Technology Thonburi (KMUTT), Bangkok, Thailand
