

Habitat Adventure Trail Scavenger Hunt

Medoc Mountain State Park

by Lauren V. Greene, UNC Institute for the Environment

Instructions and Recommendations:

- Complete this scavenger hunt as you follow the educational Habitat Adventure Trail.
- As you hike this accessible, paved 0.5 mile trail, you will come to stations with educational signage where you will find the answers to the scavenger hunt.
- The pictures and wording on the station signs usually are mirrored on the scavenger hunt.
- The questions follow the numbered order of the trail.
- Each person can complete the scavenger hunt individually or they can work in pairs or groups.
- Consider setting a timer at each station to allow students time to interact with the signs and activities.
- Completing the whole trail will take at least 30 minutes. By allowing students time to explore each station, the trail could easily take longer.
- If multiple adults are with the group, consider allowing groups to move at their own pace or at intervals to allow for less students at a station at a time.
