

# Holly Discovery Trail Scavenger Hunt

## Lake James State Park

*by Lauren V. Greene, UNC Institute for the Environment*

### **Instructions and Recommendations:**

- Complete the Holly Discovery Trail Scavenger Hunt as you follow this educational trail.
- As you hike this easy 0.75 mile trail, you will come to stations with educational signage where you will find the answers to the scavenger hunt.
- The pictures and wording on the station signs usually are mirrored on the scavenger hunt.
- The questions follow the order of the trail.
- Each person can complete the scavenger hunt individually or they can work in pairs or groups.
- Consider setting a timer at each station to allow students to time interact with the signs and activities.
- Completing the whole trail will take at least 30 minutes. By allowing students time to explore each station, the trail could easily take an hour.
- If multiple adults are with the group, consider allowing groups to move at their own pace or at intervals to allow for less students at a station at a time.
- You may choose between the 2 scavenger hunt options:
  - (no creek) doesn't have a question from the sign near the creek but rather skips the spur trail and continues on the left fork back to the parking lot and adds a question from The Diary of a Tree
  - (with creek) includes the Aquatic Animals sign near the creek at the end of the spur trail
  - The two versions vary by only one question.
- Note: Print the scavenger hunt 2 to a page and 2 sided. Fold it in half to create a one-page booklet.
